

Go Green

With Our Compressed Natural Gas Fleet

Looking for a new way to support your corporate sustainability initiatives? Our new fleet of Compressed Natural Gas (CNG) trucks will enable you to make deliveries in the Florida peninsula and southern Georgia while minimizing your carbon footprint.

What is Compressed Natural Gas?

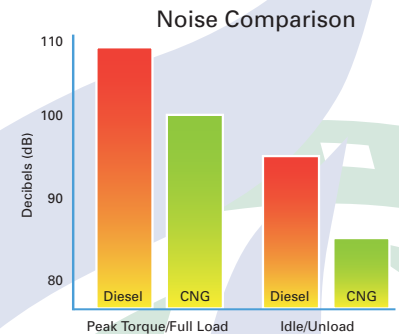

Compressed Natural Gas (CNG) is a fossil-fuel substitute for gasoline, diesel or propane. It is one of the cleanest-burning alternative fuels available with near-zero emissions. Approximately 98% of natural gas is produced in North America — enough to last more than 150 years.

Why Use a CNG Fleet?

CNG-powered vehicles can play an integral role in your corporate sustainability program. Putting cleaner, environmentally friendly trucks on the road has a number of advantages:

- **Reduced carbon footprint** – natural gas-powered vehicles produce 95% less particulate matter than comparable diesel vehicles
- **Stable costs** – cost of natural gas is less volatile than diesel
- **Significantly quieter** – it takes 10 CNG trucks to equal the volume of one diesel truck at idle
- **Safer** – dissipates into the atmosphere instead of spilling on the ground
- **Non-interruptible fuel source** – underground lines not impacted by weather events
- **Domestic fuel supply** – helps reduce dependence on foreign oil

CNG trucks are 9.9 decibels quieter than diesel trucks at idle or no load; 5.5 decibels quieter at peak torque and load.

Our Commitment to CNG

At Saddle Creek, we're committed to reducing our environmental footprint. Our fleet of Freightliner CNG tractors will reduce the fleet's carbon footprint by approximately 103,000 pounds per truck each year — the equivalent of planting 85,760 trees.

To provide fuel for the trucks, we've invested in a CNG fueling station on our Lakeland campus. This facility will be maintained by Clean Energy, the leading company for CNG site development in the country.

We take pride in providing safe, environmentally friendly transportation solutions. Examples of our commitment include:

- **CSA** – industry-leading safety scores
- **On-going sustainability initiatives** – trailer skirts, satellite monitoring, auto air inflation
- **SmartWaySM Transportation Partner**

Our for-hire CNG fleet is ready to meet your delivery needs in the Florida peninsula and southern Georgia.

About Saddle Creek

Based in Lakeland, Fla., Saddle Creek Corp. is a nationwide third-party logistics company. We have the resources and expertise to meet your integrated logistics needs:

- Warehousing, transportation, packaging and fulfillment services
- Cross-docking and pool distribution capabilities
- 28 locations, totaling 14 million feet of warehouse space
- More than 2,000 associates
- Founded in 1966
